Variable Strobe Light Part # 9940

<http://www.gssteched.com/9940.html>

This excellent Strobe Light produces a very high intensity, white light for short durations. The speed of the flash rate can be varied from one to two per second to twelve or more per second. It comes with a quality 5-watt flashtube which can be used for many hours, even with continuous use. This strobe can be converted to manual operations for use with camera equipment. It has many safety and special effect applications. Use it for 'stop motion effect' like old-time movies, etc. Easy to build and maintain. Comes with complete instructions.

\$9.70 ea

Nerve Tester\Shocker Part # 9970

<http://www.gssteched.com/9970.html>

This kit is actually two separate projects built into one. They are both designed to test your 'nerves'. Want to be a surgeon, better have calm hands. Try this with your friends and you'll be laughing your head off. You can either feel the 'shock' or turn on an LED to indicate the calmness of your nerves. I dare you to try! Also, you can build a 'shock box' by putting the kit into a metal box (any box covered with aluminum foil) such that the lid and the rest of the box is not electrically connected so when someone (unsuspecting) touches the box with one hand and opens the lid with the other, you will get a shock. The kit allows you to vary the strength of the shock and it runs on a 9 volt battery. This is one of the most fun kits you will even build! Comes with complete instructions.

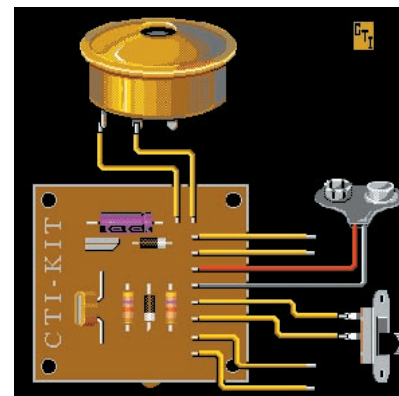

Only
\$5.65 ea

Burglar Alarm with reset switch Part # 9906

<http://www.gssteched.com/9906.html>

This kit is perfect to protect your automobile, home or business. It will monitor normally-closed switches and normally-open switches at the same time. It is small and can be easily hidden. It will sound its own buzzer or the horn on your car. It can be connected to any large siren, etc. Comes with complete instructions.
