

Low-Cost Science Kits and Labs for Elementary School Students ----- with a 10% donation to the school -----

This is an ON-GOING program for Schools. These many HANDS-ON SCIENCE LABS and KITS teach science concepts and give students SCIENCE FAIR PROJECT IDEAS.

GSS Tech Ed has been manufacturing and providing Tech Ed and Science products for over 35 years. We will provide each student with a STUDENT TAKE-HOME CATALOG/ORDER FORM. More Catalog/Order Forms are sent with each order, so you always have some on hand.

Order Delivery Time: Orders are shipped within 48 hours of receipt. Allow 5 working days for delivery. Send all the completed CATALOG/ORDER FORMS to:
Gibson Sales Systems. 31500 Grape St. Bldg. 3-364, Lake Elsinore CA 92532.

Our website address is www.GSSTechEd.com and our toll-free number is 800-422-1100 phone number and our fax number is 800-913-8310.

You can look at our Science Kits and Labs on our website at www.GSSTechEd.com/science_kits.html

Benefits to Parents:

Our prices are very competitive. Our system is convenient. Parents will not have to run all over town looking for the science kits anymore. By placing science kit orders through the school, you have saved money and time.

Benefits to Students:

The Catalog/Order Form is full of low-cost fun-to-do Science Kits and Labs. They are excellent gifts for birthdays and holidays. You can work on these with your children and everyone will benefit. Your children can use concepts that they have learned in these Labs and Kits to do reports and projects, using the parts in the experiments as props. Earn lots of extra credit as well as keep the student interested.

Benefits to Teachers:

As your students perform the experiments in these labs and kits, it will reinforce the concepts that you are teaching and help them remember. Their test scores should improve by using these exciting hands-on science products. Ideas will come to your students about winning Science Fair projects that they will need to do. Have each student give a report, on the labs and kits they build, to the rest of the class. This way the whole class will benefit from what each student has learned. Science Day in your class, where students tell about the experiments they did, will become the best day of the week.

Donation of 10% to School:

GSS ships your orders directly to the school along with all the order forms that you submitted so the Science Kits and Labs can be handed out to the students. Along with your order, the school will receive a check from Gibson Sales Systems for 10% of the total order. Shipping is Free to the school.
